

Senior Software Developer

ROLE OVERVIEW

We are seeking a highly skilled Senior Software Developer to lead complex backend initiatives. The ideal candidate will be a versatile engineer experienced in architecting scalable systems using both modern Python frameworks and traditional PHP-based environments.

TECHNICAL REQUIREMENTS

- **Python Expertise:** Extensive experience with **FastAPI** and **Django** for building high-performance APIs and service-oriented architectures.
- **PHP Proficiency:** Strong command of **Laravel** for legacy system maintenance and integration.
- **Data & Scraping:** Advanced knowledge of **web scraping** techniques for high-volume data extraction.
- **Database Management:** Deep expertise in **PostgreSQL (PGDB)**, including schema design, performance tuning, and query optimization.
- **Architecture:** Proven ability in **System Design**, including microservices, caching strategies, and message queue integration.

KEY RESPONSIBILITIES

- Architect and maintain robust, scalable backend services.
- Design data models and optimize complex PostgreSQL databases.
- Develop and maintain high-efficiency web scraping pipelines.
- Collaborate with cross-functional teams to integrate Laravel-based services into Python-driven infrastructures.
- Lead system design reviews to ensure fault-tolerant and high-concurrency solutions.
