and Django and implemented these API's (Gmail Rest API, Microsoft Graph, Zoho API)

- I also worked on architecture of Job Matching Tool Made in Python NLP.
- I worked on creating Automated REST API for LMS Portal, Auto Job Applying tool which was made in Selenium

Oct 2019 - Apr 2020

Senior Software Developer

Grafotics

- I have had the privilege of working on a range of exciting projects in the realm of finance and data management.
- Notably, I developed a loan application app using Flutter, catering to both 2-wheeler and 4-wheeler financing needs.
- This involved creating intuitive user interfaces, seamless navigation, and secure data handling to enhance the overall user experience.

Jun 2017 - May 2019

Backend Developer

Innov8 Infotech

- As a full-time developer at Innov8 Infotech, I had the privilege of working on a variety of exciting projects.
- Notably, I played a key role in the development and implementation of an e-commerce project, which involved integrating the WhatsApp API for streamlined signup and login processes.
- This allowed users to easily access and engage with the platform using their existing WhatsApp accounts.

May 2024 - Present

Senior Software Engineer

Receivables Exchange Of India Limited

- Designed and developed a customized CRM system from scratch to streamline customer relationship management workflows and improve operational efficiency.
- Built a project management tool end-to-end, eliminating dependency on third-party tools and achieving significant cost savings.
- Identified and resolved critical bugs and performance issues, ensuring stable, reliable, and seamless system functionality.
- Developed secure middleware services to validate login credentials for non-secure URLs, strengthening overall system security.
- Automated multiple business and operational processes to reduce manual effort and improve efficiency.
- Implemented Salesforce (SFDC) integration to:
- Synchronize Accounts, Leads, and Opportunities between TREDS and Salesforce (bi-directional sync).
- Automatically create TREDS onboarding accounts from Salesforce Leads.
- Sync transactional data for both Financier and Non-Financier dashboards, enabling real-time business insights.
- Built scalable backend services using FastAPI, ensuring high performance and reliability.
- Worked extensively with PostgreSQL, Oracle Database, SQLAlchemy, Redis, and OTP-based authentication, delivering robust, secure, and scalable solutions.
